## Professional Experience

---

### Research Positions.....

<b>MACE Lab, University College London</b>	<b>London, UK</b>
<i>Research Associate</i>	<i>Actual position (since Oct. 2024)</i>
<b>McDonald Institute for Archaeological Research, University of Cambridge</b>	<b>Cambridge, UK</b>
<i>Research Associate</i>	<i>May 2021 - June 2024</i>
Studying spatial patterns of cultural variation during the Jomon-Yayoi transition to infer evolutionary changes in cultural interconnectivity and the presence/absence of cultural boundaries. ERC project ENOUNTER (ERC-2018-STG 801953)	
<b>DySoC/NIMBioS/Anthropology/School of Information Science, UT</b>	<b>Knoxville, TN</b>
<i>Postdoctoral Fellow</i>	<i>Dec. 2019 – Mar. 2021</i>
Working with DySoC faculty members to explore and test the role of social learning strategies in human cooperation and cultural change across the ages.	
<b>Barcelona Supercomputing Center</b>	<b>Barcelona, Spain</b>
<i>Predoctoral Researcher</i>	<i>Jan. 2015–Jan. 2019</i>
Predoctoral researcher at the Barcelona Supercomputing Center (BSC) working for the ERC project EPNET (ERC-2013-ADG 34082). Main tasks: development, test and simulation of new model on supercomputing environment. Data analysis and visualisation. Test and validation of theoretical model against archaeological and historical data.	
<b>LUTIN-Université Paris 8</b>	<b>Paris, France</b>
<i>Research Engineer</i>	<i>Jan. 2010–Mar. 2012</i>
1 week to 3 months short contracts: modeling, data processing & statistical analysis.	

### Teaching Positions.....

<b>University of Cambridge</b>	<b>Cambridge, UK</b>
<i>Supervisor</i>	<i>Michaelmas 2023, Lent 2024</i>
Supervision for paper A11 - From Data to Interpretation, undergraduate students.	
<b>University of Cambridge</b>	<b>Cambridge, UK</b>
<i>Supervisor</i>	<i>Lent 2023</i>
Supervision for paper B13 - Cultural Evolves, undergraduate students.	
<b>Université Paris Dauphine</b>	<b>Paris, France</b>
<i>Junior Lecturer (Chargé de cours)</i>	<i>Sept. 2011–Jan. 2012</i>
Course for 2nd yr. university students. Total amount of teaching: 36hr. Elementary notions of algorithmic and databases manipulation (w/ Foxpro).	
<b>Université Paris 8</b>	<b>Paris, France</b>
<i>Junior Lecturer (Chargé de cours)</i>	<i>Sept. 2010–Jan. 2012</i>
Course for undergraduate students (License Students). Total amount of teaching: 144hr. C2I course – teaching of office tools (open source version of Word,Excel,PPT) & general knowledge of computers (software/hardware/network).	

### Research Stays.....

<b>University of Trento</b>	<b>Trento, Italy</b>
<i>Visiting Scholar</i>	<i>January 2024</i>
10 days visiting scholar with professor Alberto Acerbi. Design and exploration of chain experiments with Large Language Models funded by the Turing Institute.	

**NIMBIOS-University of Tennessee** **Knoxville, USA**  
*Visiting Scholar* *June 2018*  
One month visiting scholar with professor Alex Bentley. Development of models of spread of information on online social media. Validation of the models against datasets using Approximate Bayesian Computation.

**LORIA** **Nancy, France**  
*Visiting Student* *May 2010*  
One week stay in the team of Olivier Simonin. Technical configuration of Khepera III robot. Learning and adapting a greyscale color floor system to guide the robot.

## **Internships.....**

**Supervisor: E. Zibetti (CHArt-Univ. P8)** **Paris, France**  
*Human Heuristic & Autonomous Robot* *Sept. 2009–Jan. 2011*  
Development of a Java API to control a Khepera III robot via an autonomous controller base on heuristic strategies extracted from Human Behavior.

**Supervisor: A. Green (Dept. de Physio.-UdeM)** **Montréal, Canada**  
*Controller for physiological experiments* *May 2009–Aug. 2009*  
Graphic interface & communication's tools to control and synchronize experimental setup designed for physiological studies on monkey's nervous system.

**Supervisor: V. Daubin (LBBE-UCBL)** **Lyon, France**  
*Phylogenetic, Bacteria & LGT* *May 2008–Aug. 2008*  
C++ implementation of an algorithm used to adjust the species tree with the genetic tree including duplication and Lateral Gene Transfer.

## **Organisation and Edition**

---

### **Editorial Activity.....**

**Associate Editor** **HSSCOMM**  
*since June 2022*  
Associate editor for Nature Portfolio's open access journal: Humanity and Social Sciences Communication.

**Guest Editor** **Adaptive Behavior**  
*October 2020*  
Assistant Editor of the special issue "Evolution of Cultural Complexity", published as the Issue 5 of the volume 28 of journal of Adaptive Behavior.

**Reviewer** **Various journal**  
*Since 2019*  
Reviewer for various peer-reviewed journals such as: HSCOMM, JAMT, JAS, PLOS-One, PeerJ Computer Science and others.

### **Conference & Seminar Organisation.....**

**Garrod Seminar Series “Cultural Evolution & Archaeology”** **Cambridge, UK**  
*Michaelmas 2023*  
Organisation of the principal Seminar Series of Cambridge's Department of Archaeology. Invited Speakers: Alex Mesoudi, Mike O'Brien, Fiona Jordan, Ruth Mace, Felix Riede, Valentine Roux & Stephan Shennan.

**Workshop “Social Modelling & Simulation”** **Barcelona, Spain**  
*December 2023*  
Organisation of a 2-days workshop on the use of tools from physical, mathematical, and computational sciences to understand social phenomena.

**Workshop: “Archaeo-Riddle: The Ultimate Challenge” @ EAA** **Belfast, Northern Ireland**  
*August 2023*  
Organisation of a one day workshop at the 29th Annual Meeting of the European Association of Archaeologists on the use of tactical simulations and collaborative science in Archaeology .

**Session: “Bayesian Inference in Archaeology” @ CAA** **Amsterdam, Netherlands**  
*April 2023*

Organisation of a session at the 2023 Conference in Computer Applications and Quantitative Methods in Archaeology.

**Seminar: “Computational & Digital Archaeology Laboratory”**

**Cambridge, UK**

*September 2022 to June 2023*

Organisation of 14 lectures on Computational Archaeology at Cambridge University Department of Archaeology.

**Evolution of Cultural Complexity III**

**Thessaloniki, Greece**

*September 2018*

*Website: <https://simoncarrignon.github.io/ccs18/>*

Organisation and chair of the satellite “Evolution of Cultural Complexity” at the 2018 Conference on Complex System. Invited speakers: Peter Turchin & Anne Kandler.

**Evolution of Cultural Complexity II**

**Cancun, Mexico**

*September 2017*

*Website: <https://simoncarrignon.github.io/ccs17/>*

Organisation and chair of the satellite “Evolution of Cultural Complexity” at the 2017 Conference on Complex System. Invited speakers: Sergi Valverde, Tom Froese & Alex Bentley.

**Darwin as a Conductor**

**Lyon, France**

*Avril 2013*

*Website: <http://laremi.net>*

Organisation and chair of a 3-days conference on the use of Darwinian theories to understand changes in music. Invited speakers: Olivier Morin, Mathieu Charbonneau & Steven Jan.

## **Education**

---

### **Academic Curriculum**

**Universitat Pompeu Fabra**

**Barcelona, Spain**

*PhD Student in Biomedicine*

*2015–2019*

Co-evolution of trade and culture : theoretical study of the evolution of a decentralized economy driven by cultural dynamics. Focus on the Roman Empire case study. Co-direction between Barcelona Supercomputing Center and Univ. Pompeu Fabra Complex System Lab.

**Université Denis Diderot Paris 7**

**Paris, France**

*Master Student in Logic, Philosophy, History and Sociology of Science*

*2011–2013*

Classes in Hist., Philo. & Socio. of Sciences. Topic of interest: Evolutionary Theory and the epistemic link btw. Evolutionary Robotics & Evolutionary Biology.

**École Pratique des Hautes Études**

**Paris, France**

*Master Student in Natural & Artificial Cognition*

*2009–2011*

Classes in Cognitive Sciences with courses of Neurosciences, Cognitive Psychology & Artificial Intelligence.

**Université de Montréal**

**Montréal, Canada**

*Exchange Student*

*2008–2009*

One year exchange with courses in Neurosciences, Artificial Intelligence & Bioinformatics.

**Université Claude Bernard Lyon 1**

**Lyon, France**

*License Student in Computer Science, sp. MIV*

*2007–2009*

License with courses in Biology, Computer Science & Bioinformatics.

**Université Joseph Fourier**

**Grenoble, France**

*License Student in Computer Science & Biology.*

*2005–2007*

Two years to learn the fundamentals in Computer Science & Biology.

### **Theses**

**Supervisor: N. Bredèche**

**LRI-INRIA-Paris Sud**

*Mars – Aug. 2011*

*Master “Natural & Artificial Cognition”, École Pratiques des Hautes Études (Paris,Fr)*

*Title:* Self-organization in swarm of autonomous agents: evolution of specialized behaviors.

*Abstract:* The thesis investigates the emergence of speciation within a population of autonomous robotic units evolving under environment-driven adaptation. It focuses on the case of sympatric speciation (speciation occurring without geographical isolation) and demonstrates that such speciation is achievable in a robotic setting under specific constraints related to mating opportunities and resource distribution.

**Supervisor: F. Bouchard**

**CIRST-UdeM (Canada)**

*Apr. – Sept. 2013*

*Master “Logic Philosophy History & Sociology of Sciences”, Univ. Paris 7 (Fr)*

*Title:* Evolutionary Robotics as a model to study Evolutionary Biology.

*Abstract:* To justify the use of Evolutionary Robotics as a model to study evolution, this thesis first explains the general principles and the history of Darwinian evolution, reviews current approaches to understanding evolution, underlines the pertinence of models and simulations in studying life, and concludes that ER, as an embodied artificial life experiment, combines numerous advantages that make it an ideal model to study evolution.

**Supervisors: S. Valverde & X. Rubio-Campillo**

*PhD School of Biomedicine, Universitat Pompeu Fabra (Barcelona, Spain)*

**BCS-Complex Systems Lab-UPF**

*Sept. 2015 – Sept. 2019*

*Title:* Content-dependent biases in social learning strategies: a multiscale approach.

*Abstract:* The content of what we learn shapes the evolution of human culture and society. This thesis quantifies the influence of content-dependent biases in social learning strategies. It first lay the base of a theoretical framework combining agent-based models and Bayesian inference to measure content-dependent biases in large-scale social learning strategies. A first empirical study then measures the impact of social transmission biases in Twitter. The novelty of the second case study is two-fold: it is one of the rare uses of computational modelling in historical Roman Studies and one of the first tests of the impact of success bias across large spatial and temporal scales.

**Summer School & Workshop**

**2018 DySoC Critical Workshop**

*Modeling Complex Systems in Archaeology*

**Knoxville, USA**

*June 2018*

Workshop to discuss, evaluate and increase awareness about Complex System techniques in Archaeology

**2018 NECSI Winter School**

*New England Complex System Institute Winter School*

**Cambridge, USA**

*January 2018*

Intensive week-long courses on complexity science: modeling, networks, and data analytics.

**2017 UrbNet**

*UrbNet, Aarhus University*

**Aarhus, Denmark**

*October 2017*

Specialist workshop for the Danish-German Jerash Northwest Quarter Project.

**2016 SFI CSSS**

*Santa Fe Institute Complex System Summer School*

**Santa Fe, USA**

*June 2016*

4 weeks series of lectures, labs, and discussion on foundational concepts, tools, and current topics in Complexity Science.

**1st DACAS International Workshop**

*Data And Cities As Complex Adaptive Systems*

**Manchester, England**

*Feb 2016*

Development of an innovative and cross-disciplinary set of tools to study cities as Complex Adaptive Systems.

**Scientific World Conception Summer School**

*The Computational turn: Simulation in Science.*

**Vienna, Austria**

*July 2015*

Discussions & lectures on the epistemological consequences of the use of computational methods and simulation in science.

**Summer Institute in Cognitive Sciences**

*The Evolution and Function of Consciousness.*

**Montreal, Canada**

*September 2012*

Week of lectures on the Evolution and Function of consciousness.

## Grant & Fundings

<b>UK-Italy Trustworthy AI Visiting Researcher (2024):</b> Exploring LLM & cultural evolution	<b>£3 540</b>
<b>Garrod Seminar (2023):</b> Fund from University of Cambridge to organise Michaelmas Garrod Seminar Series	<b>£2 000</b>
<b>C2D3 ECR Seed Fund (2023):</b> Exploring socio-economic processes behind sustainable food system adoption	<b>£3 425</b>
<b>BA/Leverhulme Small Grant (2023):</b> A collaborative game to improve archaeological inference	<b>£9 644</b>
<b>Severo Ochoa Mobility Grant (2018):</b> Accommodation & travel for 1-month visiting research	<b>2 000€</b>
<b>NECSI Winter School Scholarship (2018):</b> Inscription fees for NECSI winter school	<b>\$1 300</b>
<b>DACAS Early Career Bursary (2016):</b> Accommodation & travel for DACAS Workshop	<b>£350</b>
<b>ENS Lyon - Junior Lab (2011-2013):</b> Funding for meetings, experiments and conferences	<b>3 000€</b>

## Languages

---

**French:** Mother Tongue

**English:** Good

**Spanish:** Good

*Written & spoken academic English*

*Fluent daily use*

## Technical skills

---

**OS:** Linux (Ubuntu/Debian/rasbian end & admin user), FreeBSD, Windows XP, Seven, Vista. Grid/Supercomputer usage.

**Publishing:** L<sup>A</sup>T<sub>E</sub>X/ LuaT<sub>E</sub>X, Open Office & Microsoft Office Writers.

**Programming:** C/C++, R, Bash, Python, (Java, Php).

**Parallel Computing:** MPI (R/C/C++/Python), SLURM, LSF.

**Statistical analysis/Visualisation:** R.

**Git repositories:** [@github.com](#) | [@framagit \(gitlab\)](#) | [@cambridge \(gitlab\)](#)

## Interests

---

Among other things, I used to have a lot of associative activities mostly revolving around music and sciences communication & popularisation. I like reading, walking in the hills of my childhood and dive into the Linux CLI.

## Publications & Conference

---

### Peer reviewed paper in journal or proceedings.....
